### PENNIES FOR PATIENTS

We recently wrapped up our Pennies For Patients fund raising campaign to benefit the Leukemia and Lymphoma society. We raised \$1,348.69 and all of this goes to the L and L society to help treat and research childhood diseases. The top fund raising classroom was Ms. Hartinger's 8th grade and they will receive a free pizza party donated by Dominoes Pizza.

Thanks you to all who donated to this cause.

### DAVINCI STUDENTS PARTICIPATE IN THE EMPTY BOWLS PROJECT

The January Intercession with Ms. Beil was more than just making ceramic bowls and sculptures. Each student in the class made a bowl to donate to The Empty Bowls Project. The Empty Bowls Project, is an international effort to fight hunger, and was started in the fall of 1990 by two potters in Michigan to help raise money for a Thanksgiving fund drive for a local food bank. Since then the idea has spread around the United States and all over the world. In every location, each year artists and their friends create handmade bowls and donate them to the Empty Bowls Project. Then these same volunteers serve a simple meal of soup or pasta, bread, & water. Guests choose a bowl to use that day and to keep as a reminder of all the empty bowls in the world. In exchange for the meal and the bowl, the guest gives a minimum donation. All proceeds go to a hunger-fighting organization. This year the Hopkins Center for the Arts in Hopkins held the event on March 15 and raised funds for the community food shelf. DaVinci students donated a total of 23 bowls. A special thanks to the eighth grade students who finished glazing the bowls so that they could be donated to the event.

### Artist Jan Elftmann returns to DaVinci Academy

Jan Elftmann has returned to work with fifth grade students to build art machine sculptures out of recycled objects. Art and science are intertwined to bring home instructional goals. Students will build sculptures while reviewing the elements and principles of design. Using simple machines, motion, and electricity in their sculptures, students will review concepts taught in science this year.

Ms. Elftmann has a B.F.A. in sculpture from the Minneapolis College of Art and Design, and has been a professional artist and educator since 1986. She has taught art classes at Walker Art Center and the Science Museum of Minnesota. Her work has been exhibited locally, nationally, and internationally. You may see her Holy Circle car parked at school since she is the curator of the annual ArtCar Parade in Minneapolis.

The residency is provided thru an ASAP grant from the Perpich Center for Arts Education and lasts for five weeks.
